### Professional Experience

---

Wikoff Color Corporation | Fort Mill, SC

June 2019 to Present

#### *Analytical Chemist*

- Develop and validate methods that assess raw materials and products to support R&D team
- Interact with field service engineers and attained skills to maintain all lab equipment within the lab
- Ability to drive team's productivity levels while working and learning independently
- Train new team members to operate and manage instruments in the analytical room for proper safety usage during operation
- Utilize diagnostic tools and software to repair and troubleshoot all analytical instruments in the lab, e.g. GCMS, HPLC, FTIR, and DSA

#### *Formulation Chemist*

- Prepare manufacturing processes and create stipulations for the produced products
- Establish a method following the Association of Plastic Recyclers' guidelines to test the recyclability of energy curable inks and label
- Developed new products based on customer specifications

#### *Purchasing Agent*

- Serve as primary point of contact for orders to guarantee cost effective purchases for equipment and supplies
- Research different vendors and created an inventory database to reduce cost in procurement of materials and ensured zero breakdown in R&D productivity
- Manage relationships with suppliers, processing purchase orders, reviewing inventory and verification to ensure quality of goods in timely manner within delivery

### Certifications

---

- CompTIA Security+

December 2022
